Subject: Portland Harbor RI - Section 5

Jim – I'm currently working on the mobile sediment section (sediment traps) and was looking at the tables 5.2-1 through 5.2-4. I compared those to tables H3.1-7 and H3.1-8. I originally thought that the summary statistics were the way to go, but in looking at the information and presentation, I would rather keep the Appendix H tables and have Integral create similar tables for each quarter of the 2006/2007 sampling event. Again, these tables are to only include the ICs – could include TOC, too. Like tables would be needed for Appendix D for key contaminants not discussed.

Let me know if you need to discuss. The sooner I could get these, the better so that I can continue my edits.

Thanks,

Kristine Koch
